---

### **Professional Summary**

Junior Full Stack Developer in training with hands-on experience in web development, modern JavaScript, Node.js, SQL databases, and cloud services using AWS. Strong understanding of REST APIs, agile methodologies (SCRUM), and web application fundamentals. Currently working in an international corporate environment using English daily. Seeking a junior development role with strong growth and salary progression.

---

### **Education**

#### **Universidad Galileo – Full Stack Developer Program**

*Program supervised by Telus*

 2024 – Present

#### **Second Semester Completed**

#### **Web Security & Development**

- Built and deployed web environments using **AWS (EC2, S3, RDS, VPC)**.
- Configured and managed **Apache web servers**.
- Implemented **Load Balancers** for availability and scalability.
- Worked with **SQL databases** in cloud environments.

#### **Advanced CSS & JavaScript**

- Developed applications using **JavaScript (ES6+)**.
- Implemented core programming concepts:
  - Loops, functions, arrays, and objects.
  - Array methods: forEach, map, filter, reduce, findIndex.
- Used **destructuring**, shorthand syntax, higher-order functions, and factory functions.
- Built multiple logic-based projects and data manipulation exercises.

#### **SCRUM Methodology**

- Worked under **SCRUM framework** (Sprint 0 to Sprint 3).

- Participated in sprint planning, task breakdown, and delivery.
- Tested and validated REST APIs using **Postman**.
- Developed and tested an **Expense Tracking API**.

## Web Applications

- Developed a complete **inventory management system** using **JavaScript and Node.js**.
- Advanced array handling:
  - Creation, modification, search, filtering, sorting.
  - Multidimensional arrays.
  - Sales data analysis and reporting.

---

## Technical Skills

- **Languages:** JavaScript, SQL
- **Backend:** Node.js
- **Frontend:** HTML5, CSS3
- **Cloud:** AWS (EC2, S3, RDS, VPC, Load Balancer)
- **Tools:** Git, GitHub, Postman, Visual Studio Code
- **Methodologies:** SCRUM
- **Operating Systems:** Windows, Linux
- **Web Servers:** Apache

---

## Professional Experience

### Telus International

*Manual Tester*

Jan 2026 – Present

- Testing new changes in the apps.
- Test cases designed for Smoke testing and regression Testing.
- Comparing changes with the Business requirements.
- Holding calls with the development team in case of app incidents.
- Opening Bugs when the app is not working as expected.

- Testing fixes in the apps after a new deployment.
- The technologies used were JIRA, SQL server PostgreSQL, Postman.
- Once the scenarios are clear, document the manual result to Automate.
- Organizing Demos for Automation Testing Team.

#### *Technical Support Representative*

 Aug 2024 – Dec 2025

- Analyze and resolve technical incidents following quality standards.
- Document issues clearly and accurately.
- Communicate effectively in **English** with international clients.
